

Mining Equipment – Jackleg Drill

JACKLEG DRILL – VK S250

The **VK S250 Jackleg Drill** technically equivalent to Secan S250 jackleg Drill has always been the top choice for miners demanding high performance, exceptional control, and long-lasting reliability. The VK S250 jackleg Drill allows operators to drill in confined spaces at challenging orientations while delivering high penetration rate and strong torque even at low air pressure.

Applications

- Rock drilling work
- Wet drilling on hard medium hard rock
- Drilling horizontal or inclined blast holes.

Technical Data

Specifications	Metric	Imperial
Weight	35.2 kg	77.6 lb
Total Length	708 mm	27.9"
Air Consumption	73 l/s	155 cfm
Working Air Pressure	6 bar	87 psi
Piston Diameter	79.4 mm	3.12"
Piston Stroke	73.25 mm	2.88"
Impact Rate	2200 blows/min	
Air Inlet	25 mm	1" BSP
Water Inlet	12 mm	0.4"
Shank Size (Hex)	22 x 108 mm	7/8 X 4 1/4"

Features

- Top choice for miners demanding high performance.
- Delivers high penetration rate and strong torque, even at low air pressure.
- Minimal downtime and reduced maintenance costs.
