

Mining Equipment – Pusher Leg

PUSHER LEG – VK PL250

Features

- Feed control on pusher leg
- Easy to connect

The **VK PL250 Pusher Leg** technically equivalent to the Boart Longyear A755A Pusher Leg, is a durable and efficient support system designed for the S250 Jackleg Drill. Built from high-strength aluminum alloys originally developed for the spacecraft industry, it offers both reliability and longevity. Its ergonomically positioned feed controls provide improved operator comfort.

Application

- Production drilling
- Mining and Construction
- Underground Mining

Technical Data

Model – VK PL250 Pusher Leg		
Weight	13.6 kg	30 lb
Piston Diameter	68 mm	2.7 in
Feeding Length	1295 mm	51 in
Length Extracted	3022 mm	119 in
Length Retracted	1727 mm	68 in
Suitable Rock Drill	Boart Longyear S250 Jackleg Drill
